	All shipments were dispatched
	At the end of February 1952, Frankfurt/Oder, with the branch office in Fuerstenwalde had allotted 220,000 eastmarks to the armunition depot at Milmersdorf for the construction of 1 three-story brick building for the quartering of 330 men, 2 brick watchtowers and a 500-meter long spur track. Construction work was scheduled for about mid-March 1952.
.	* Comment. The incoming armunition was listed in previous reports. Dost of the outgoing shipments in the present report were based on rail movements.
	demand for armunition has dropped and that the supply from the U.S.S.R. as compared with that in December 1951 has been reduced to 10 percent, i. e. from 1,266 carloads to 133 carloads. The devots are believed to be filled to capacity.
